

## Quality sheefed and carton printing

### Product Features

- Exact Dot offers outstanding edge cut resistance from a highly resilient surface compound, and enables use with a variety of sheet sizes without the need for blanket changes.
- The special micro ground surface finish gives outstanding print quality with sharp dot reproduction across a variety of papers, boards and printing pressures, whilst also providing excellent sheet release on high speed presses.
- Exact Dot is designed for use with conventional inks and affords excellent ink transfer, enabling printing with low ink film weight.
- The innovative compressible layer gives excellent smash resistance and ensures increased durability and blanket life.

### Advantages of Exact Dot

- Excellent sheet release.
- Sharp dot reproduction.
- Excellent smash resistance and durability.

Features	Benefits
• Micro ground surface.	• Gives excellent sheet release and ink transfer, resulting in controlled dot gain and dense even solids on a variety of papers and boards.
• High quality stabilising fabric.	• Provides extra durability and robustness.
• Thick compressible layer.	• Ensures excellent recovery from smashes.
• Dense low stretch fabric.	• Provides extra stability.

<b>Colour</b>	Blue
<b>Face compound</b>	Solvent resistant rubber blend
<b>Surface finish</b>	Ground – Ra 0.7µm Typical
<b>Thickness</b>	1.96mm
<b>Microhardness</b>	63°
<b>Compressibility</b>	0.17mm @ 1060 kPa Typical / 0.27mm @ 2060 kPa Typical
<b>Elongation</b>	<0.70% @ 10 N/mm
<b>Tensile strength</b>	>60 N/mm
<b>Ink compatibility</b>	Conventional Sheefed inks
