### EXPERIENCE – BUILDING MACHINES SINCE 1974

The first NESCHEN laminator, K600, was unveiled in 1974 at the Photokina. Since then, we have been constantly improving the performance, reliability and stability of our machines. With the new NESCHEN laminator Series we are returning to our roots:

HIGH-PERFORMANCE LAMINATORS DESIGNED BY NESCHEN, MANUFACTURED IN EUROPE, ADDED VALUE FOR OUR CUSTOMERS WORLDWIDE.

NESCHEN ColdLam 1650 and NESCHEN HotLam 1650 TH are two absolute all-rounders for every application. We do not just build for our customers but with our customers. During the design phase we worked in close cooperation with users all over the world and we put our 40 years of experience into the design. Our aim was to build a machine which makes your everyday work easier and more efficient at a reasonable price. Our designers placed a special focus on user-friendliness. This allows the users to carry out the majority of repair works themselves. Bad for our business, good for you and your customers.

### MADE IN GERMANY SINCE 1889

NESCHEN stands for adherence, protection, presentation - and has for over 125 years. In the growing market of visual communication and large-format printing NESCHEN has always been a guarantor for innovation and stability. Our products in the graphics sector range from enhancement films, protection films and mounting films up to printable media which can be used with state-of-the-art digital print technologies, for example in the field of architecture, decorations and advertising. We are a partner of print service providers, architects, designers, photographers, interior designers and advertising agencies. Our efficient laminators and high-quality display systems complete our product range in the business unit 'Graphics'.
